Great call!! Love the enthusiasm of the potential planners.

Here's the Zoom chat by topic area:

Agenda/program suggestions:

- Quantum
- ChatGPT
- Futurists
- Intelligent Automation/hyper-automation
- CX (fed embrace of industry 4.0)
- Immersive experiences
- Green initiatives – ML processing open source data
- 5G
- Future of work
- Digital twin tech
- Innovation adoption
- Open6G
- "Are you ready for innovation?" cultural fit
- Topic modeling for search engines
- building on data as an asset - Data Sharing as Service; Responsible/Ethical AI and Customer Experience, Automation for Ethical Data Handling
- OTAs
- Acquisition and adoption of new tech
- Efficient use of blockchain in public administration
- Innovation at the service of the mission
- ET serving the underserved
- Innovation and Technical Debt - Make sure it reduces your debt, not increases it
- ET in an Increasingly Collaborative World

- Another topic is expansion of the ARPA model - it's now in health and energy. Could be expanded to drive innovation

International engagement:

- Research as a Service -- maybe instead of outside the country -- maybe it is with Higher Ed /Universities -- to show the power of the whole country

Keynotes:

- Karl Mathias, CIO at HHS
 - Brian Whittaker, FDIC
 - Katie Savage, DOD
 - Young Bang, Army
 - Academia could also tie nicely to staffing and hiring - it's a big part of how some agencies drive innovation (e.g. NSF)
 - Dr. Jill Marlowe, Digital Transformation Officer – NASA
 - Jill (NASA) could speak to a lot of the theme we explored during the call (Digital Twin, Data as a Service, Culture Change, etc.)
 - Erwin Gianchandani NSF
-
- Drew Myklegard
-
- Clare Martorana

Hi (b) (6) - I think you mentioned that people could email you after the meeting about program ideas

Here's a thought - we recently ran into a recruit that suggested everytime they see emerging technology being discussed that it's often about software end of things and why not the hardware (notwithstanding IoT, of course)

In any case, this person provided an interesting suggestion around *semi-conductors and their relevance to emerging technologies*. In other words, as we look forward to the anticipated results of the CHIP Act and everyone that's organizing around it, to what extent might we see benefits in the Emerging Technology arena. Would be interested to hear what other people's takes are --- i think the programming for this (**CHIP Act**) would need to be handled with care (would need the "right" speaker/panelist) to be interesting to this audience, but it certainly is a contemporary topic and DOES have relevance to our national ability to do emerging tech. If this gets traction, I have leadership-level contacts at NSF and Commerce that are working on CHIP Act things. They themselves may not speak, but they could likely put us in touch with folks that could

Thanks

Rob Wuhrman

Great call!! Love the enthusiasm of the potential planners.

Here's the Zoom chat by topic area:

Agenda/program suggestions:

- Quantum
- ChatGPT
- Futurists
- Intelligent Automation/hyper-automation
- CX (fed embrace of industry 4.0)
- Immersive experiences
- Green initiatives – ML processing open source data
- 5G
- Future of work
- Digital twin tech
- Innovation adoption
- Open6G
- "Are you ready for innovation?" cultural fit
- Topic modeling for search engines
- building on data as an asset - Data Sharing as Service; Responsible/Ethical AI and Customer Experience, Automation for Ethical Data Handling
- OTAs
- Acquisition and adoption of new tech
- Efficient use of blockchain in public administration
- Innovation at the service of the mission
- ET serving the underserved
- Innovation and Technical Debt - Make sure it reduces your debt, not increases it
- ET in an Increasingly Collaborative World
- Another topic is expansion of the ARPA model - it's now in health and energy. Could be expanded to drive innovation

International engagement:

- Research as a Service -- maybe instead of outside the country -- maybe it is with Higher Ed./Universities -- to show the power of the whole country

Keynotes:

- Karl Mathias, CIO at HHS
- Brian Whittaker, FDIC
- Katie Savage, DOD
- Young Bang, Army
- Academia could also tie nicely to staffing and hiring - it's a big part of how some agencies drive innovation (e.g. NSF)
- Dr. Jill Marlowe, Digital Transformation Officer – NASA
- Jill (NASA) could speak to a lot of the theme we explored during the call (Digital Twin, Data as a Service, Culture Change, etc.)
- Erwin Gianchandani NSF

- Drew Myklegard

- Clare Martorana

(b) (6)

Thanks for agreeing to take this on (assuming everything in the intake form looks doable). I've attached the two intake forms for your review. I explained in my earlier email that the 30 Sept due date is a placeholder, so feel free to offer a date, otherwise I'll put a soft date that we can update once you've had a chance to talk to the client and do a proper analysis of the request.

Please let me know if you have any questions. We'll add you to the meeting invite tomorrow so you can hear from Jason / Kevin their thoughts on the deliverable.

Thanks, and have a great day.

V/r,
Terrell

Agree that (b) (6) would be good to have plugged in here

All good points about the curve (and how it's accelerating) a lot to unpack there on multiple fronts especially in an environment where agencies tend to grapple with some of the most common sense and mundane of changes on the modest things that they ALREADY do it's all across the usual backdrop of authorities (or not) for change, sparse/diminishing budget and funding mechanisms, legacy/workforce/procurement, the quest to shift our delivery models, much less navigating the risk-averse, change-resistant environment that we often see in the agencies Especially when, to your point, the opportunities are only going to keep coming in FASTER and more transformationally, not slower and incrementally Agree it would be good to get the wake-up call going that an accelerating environment these factors are even MORE of a point of interest, not less

and (b) (6) yes I too remember from the 80s some talk of fusion specifically sitting in my car driving down the road hearing the excitement [1989 event where they purportedly had created "cold fusion"](#) (also the disappointment it ended up being) was reminded of that this week on what sounds like this latest round of what appears to be great news (re: fusion) seems like its real this time (am also glad it's happening in the US, though we know others may not be too far behind all the more reason to get everyone smart about working in an accelerating environment)

Tim, I looked for the podcast and couldn't find it I did find this one on Quantum from Cambridge last May (<https://www.stitcher.com/show/the-buzz-with-actiac/episode/eymi-quantum-computing-and-the-future-of-cybersecurity-203644881>) but I don't think that's the one you're talking about?

I loved today's article in the Post about positive energy from fusion. I have been watching this since my physics class in high school (in the 80's when they thought they were just a few years out to positive energy)

I'd love to put our heads together on a list of "futurists" we could engage to help bring some really forward-thinking ideas to the conference

Subject: Cambridge Conference: Recommended Panel

Hi (b) (6) and Rob,

For the Cambridge conference on future tech, I think one timely topic is the exponential curve of technology evolution and how it brings accelerated change and risk to the government, and how government can adapt to become more agile and proactive. OpenAI's ChatGPT, DALL-E, and the recent breakthrough in nuclear fusion are perfect examples – and we're seeing more breakthroughs at a faster clip. I recently recorded a podcast on this as I think it's one of those critical topics for the government along with things like disinformation, deepfakes, AI ethics, and quantum cyber risk.

This could take any format, but ideally I would envision a panel composed mainly of government thought leaders who tackle these kind of risks. If you're in support of making this one of the centerpieces of the conference, I can work with Carol and other ACT-IAC teammates together to ensure we get the top speakers committed to this. I will ideally try to get Rep. Ro Khanna as this is right up his alley (he's all over emerging tech, data privacy, internet bill of rights, and pushed the Quantum Cyber Preparedness Act which is awaiting approval in the House).

Kind regards,

(b) (6)

Sweet! That was the starter code I was looking for You're like a human version of ChatGPT;)

SAML is going to be interesting as we have ForgeRock and our implementation is far from IaC

I'm going to have to set this up with a test domain as I can't seem to have more than 1 account with my james.barnds@gsa.gov and I'll have to give IAM group the code to update ForgeRock as they don't have the bandwidth to do it

On Mon, Jan 9, 2023 at 12:54 PM (b) (6) <(b) (6)@datadoghq.com> wrote:

Yes, if you created a test account we can enable the feature flag

Ironically enough, I tested and built out something very similar [using our Terraform Provider](#) (just made some tweaks to it after getting your email) What it does vs doesn't:

Does

- Creates child org from parent API and APP keys
- Uploads SAML Metadata (custom python) using newly created child keys
- Configures SAML settings like JIT or anything in the `datadog_organization_settings` resource using newly created child keys

Doesn't

- Configure Audit Trails as that is not yet exposed as a resource or even an API yet ([see Terraform provider issues](#))

Thanks,

(b) (6)

On Mon, Jan 9, 2023 at 1:21 PM James Barnds - IQ-C <james.barnds@gsa.gov> wrote:

Hi (b) (6),

Met with Ron earlier and we spoke about how to easily expand the Datadog service to new tenants and

We have a master account which can spawn new accounts We want to explore creating a TF module which we can call which would streamline this if possible and ensure that all accounts are in compliance with M-21-31 logging standards

- create new Datadog tenant account
- enable Audit logging & set audit logging bucket location

I'm going to look into how SAML integration can be automated if at all possible

If I create a new 'test' account, can you enable the 'allow child accounts' flag to be set on that test account?

Hi Walter,

Wanted to check in and see if there is anything we need to prep for this week's industry exchange webinar. Also, wanted to be sure you had the overview and FAQ we put together last week, to share with our board and partners, as questions started coming in as soon as the draft GSA requirements were emailed out and shared by GSA/EPA: <https://docs.google.com/document/d/1ROdlC2ZOoQDf95dxqQLz01MYXWcudG1P/edit?usp=sharing&ouid=100151238827719451663&rtpof=true&sd=true>

Also, for fun, sharing the conversation with ChatGPT I had this weekend, regarding uncertainty factors and EPDs. It is actually a pretty good source of talking points.

Thanks, let us know if you have any questions/comments on the FAQ document or need anything else from us.

Hi (b) (6) - If that's helpful, you can share the slides afterwards. Are you able to share your own slides during your segment of the Zoom presentation? If so, then we're okay w/ getting the slides after.

Hi Kyra,

Yes we are on for the presentation today. Will it be OK for me to share my slides with you after the meeting? I was thinking about inserting a couple more data bites in there ahead of today's presentation. So if you can wait, I'll get you the final version ahead of the presentation today.

Thank you,

Hello (b) (6) and (b) (6)

I wanted to confirm that we're set for the Tech Trends presentation tomorrow at 2pm ET. Please get the slides to me as soon as you can so we can share with the participants. If there are any issues, please let me know.

Thank you,

Kyra

Good morning (b) (6)

This is great news! Could I ask that (b) (6) plan for a 10-minute talk? He's starting the meeting so we want to ensure we have time for other speakers. We may get lots of feedback on his talk and may be interested in having a focused 1-hr Office Hour session with (b) (6) fielding questions and/or delving deeper into his paper. I regret paring his talk down, but believe we'll want to tap him again later (and maybe soon).

Thanks so much!

Kyra

(b) (6) - Thanks for helping with this. If you could get back to me by noon on Monday, that would give us time to finalize the agenda and get a marketing email out that afternoon. Might that work for you?

Hi Kyra,

After reaching out to our Research team today, our best analyst for this call is on leave until Monday (b) (6) – he developed the 2022 Tech Trends Report. It seems he has an internal company meeting during this time next Thursday, and I believe your request will take precedence over anything internal. Unfortunately, I may not hear back from him until Monday. Is that too late to give you our confirmation?

Have a great evening!

Subject: InfoTech Analyst available to provide a 15 minute talk on Emerging Tech 8/25?

Hi (b) (6) and (b) (6)

We may have a 15 minute slot on our agenda for the next IT Buyers CoP meeting on Emerging Tech in government taking place next Thursday, August 25th at 2pm. InfoTech released a [FY22 Tech Trends report](#) and I wondered if it might be possible to have someone from InfoTech present a summary of this report, tailored for a government audience. I realize it's short notice, but thought I'd give it a shot. Please let me know.

Thanks!

Kyra
